To Dentist of Concern:

_____ is pregnant and receiving obstetrical care at my office. I understand her to be in need of dental care. There is no contraindication to the following:

1. Dental x-ray with abdominal shield.
2. Local anesthetic (but without epinephrine/adrenaline)
3. Antibiotics: Penicillin/amoxicillin or Cephalosporins if not allergic. If allergic, to consider erythromycin or azithromycin.
4. Bacterial endocarditis prophylaxis as needed.
5. Tylenol, Tylenol with codeine, or other analgesia of morphine derivation if not allergic.
6. I would encourage avoidance of amalgams/silver filings.

If there are any questions or concerns, please do not hesitate to contact me.

Soheil Hanjani MD
